|----------------|--|
| CAT NO. | LCP MANDIBLE PLATE, ANGLED 3+3 HOLES |
| 708.853 | LCP MANDIBLE Plate, angled 3+3 holes THICKNESS 1.5MM |

Specification

- Plate is available in Titanium.

Indication for use

- The LCP (Locking Compression Plate) Mandible Plate is a modern fixation device widely used in maxillofacial surgery to treat mandibular fractures and osteotomies. It combines the principles of locking screw technology with compression plating, providing stable and reliable fixation.
