

CAT. NO.	METAL	BONE CEMENT
331.550	UHMWPE	BONE CEMENT GENTAMYCIN 40gm.

Specification

- Bone Cement available in UHMWPE.

Indication for use

- A cemented hip replacement uses a polymethylmethacrylate (PMMA) bone cement to fix the implant surface to the bone.
- The bone cement creates a grout and fixes the implant by acting as an interlocking surface between the implant and the bone
