### Specification

- All implants are available in TT & SS.
- All instruments are available in SS.

### Indication for use

- The Foot & Ankle Implant System is designed for the surgical fixation, correction, and stabilization of fractures, deformities, and fusions in the bones of the foot and ankle. It is indicated for use in procedures such as osteotomies, arthrodesis, fracture fixation, and reconstruction of bone deformities due to trauma, arthritis, or congenital conditions. The system supports anatomical alignment and promotes stable healing in weight-bearing and non-weight-bearing bones of the foot and ankle.
